

1

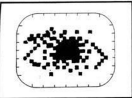

Pan down from black to reveal dome

2

Continue pan and slowly zoom so dome shape wipes up the screen

3 A

The screen fills up with the grid structure of the surface of the dome (mix origin). Square by square the shape of an eye appears - it blinks

4

Quick zoom out to <sup>see</sup> Guy lying on a table with his head all wired up - at the end of the zoom he starts as a result of electrical charge passed through to his cerebrum

zoom out to find that  
the brainwashed Blake  
is now a reflected image  
on a scanner lens

hide out Blake as the  
scanner scans left and  
right in a threatening  
manner & it returns  
to centre screen

cut to guards face  
with high key lighting

crash zoom out to  
MS of guard pointing  
his space gun direct  
to camera.

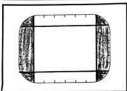

9

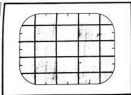

He tries and fills the screen with the blast

10

mix to fill screen with orange - zoom out to see that it is a frame of a grid

11

12

The orange forms the word 'ELIMINATE' and we see a profile of Blake as an image on a computer

13

Blake's head turns to face camera - the word 'ELIMINATE' starts to glow on a gradual decaying brighter. Blake's head moves to become white on black and then starts to recede as a white glow

14

it accelerates off into the distance. It is followed by metamorphosis of the word ELIMINATE as a pulsating orange disc - both things into the night sky with planets accelerating toward us

15

After a fast travelling sequence we hit and slow down into a time less sense of speed

16

A sun appears and rimlights the shape of the liberator and temporarily silhouettes it, as it passes out of frame. The liberator continues to make several more passing shots

Suddenly we see an eclipse of our sun with a planet which makes to a graphic symbol of an eclipse

18

This symbol zooms up to fill screen - at the same time a blue arrow pans in from left - both are frozen into their final position

19

At this point a white ball of light encircles the symbol

20

and on its return to the front of the planet it reveals 'BLADES 7' HOLD.

The ball of light returns from behind and under away 'BLADES 7' to leave the blue arrow and planet - Super sub-title center
